

## **Australian Government**

### **International Air Services Commission**

#### **DECISIONS**

**The Route:** Solomon Islands  
**The Applicant:** Virgin Australia Airlines (SE Asia) Pty Ltd  
(ABN 79 097 892 389)

**Decision:** [2018] IASC 226  
**Variation of:** [2016] IASC 114  
**Public Register File:** IASC/APP/201848

**Decision:** [2018] IASC 231  
**Variation of:** [2013] IASC 133  
**Public Register File:** IASC/APP/201853

**The Commission varies Determinations [2016] IASC 114 and [2013] IASC 133 to transfer the capacity allocated in these determinations to Virgin Australia International Airlines Pty Ltd (VAIA) and permit the capacity to be used by either VAIA or its wholly-owned subsidiary, Tiger International Number1 Pty Ltd. The permission is valid for the duration of the determinations commencing from 1 December 2018.**

#### **1 The application**

1.1 On 10 August 2018, Virgin Australia Airlines (SE Asia) Pty Ltd (VAASEA) applied to the International Air Services Commission (the Commission) to transfer to Virgin Australia International Airlines Pty Ltd (VAIA) the capacity entitlements originally allocated to VAASEA in the following determinations on the Solomon Islands route:

- [2013] IASC 133 which allocates 180 seats of capacity per week in each direction; and
- [2016] IASC 114 which allocates 360 seats of capacity per week in each direction.

1.2 In a subsequent communication to the Commission, VAASEA requested that the transfer of the capacity allocation be made effective from 1 December 2018.

1.3 VAASEA also requested that the determinations are varied to authorise the utilisation of the capacity by another Australian carrier which is the wholly-owned of VAIA, namely Tiger International Number1 Pty Ltd (Tiger International).

1.4 In accordance with section 22 of the *International Air Services Commission Act 1992* (the Act), the Commission published a notice, on 10 August 2018, inviting submissions about the applications for variation. No submissions were received. All non-confidential material supplied by the applicant is available on the Commission's website, [www.iasc.gov.au](http://www.iasc.gov.au).

## **2 Relevant provisions of the air services arrangements**

2.1 Paragraph 7(2)(aa) of the Act requires the Commission not to allocate available capacity contrary to any restrictions on capacity contained in a bilateral arrangement(s). This also means that any variations made to an existing allocation of capacity must not be contrary to any restrictions on capacity contained in a bilateral arrangement(s).

2.2 The Australia-Solomon Islands air services arrangements allow for multiple designation of Australian airlines. The designated airline(s) of Australia can enter into code share, blocked space or other cooperative marketing arrangements, as the marketing and/or operating airline with any other airline, including other designated Australian airlines and of third parties.

## **3 Commission's assessment**

3.1 VAASEA's applications seek to vary the determinations in a way that allocates, or has the effect of allocating, the capacity to another Australian carrier and as such the applications are transfer applications as so defined in subsection 4(1) of the Act<sup>1</sup>. The Commission has assessed the applications in accordance with section 25.

3.2 Subsection 25(1) provides that the Commission must make a decision varying the determination in a way that gives effect to the variation requested, subject to subsection 25(2). Subsection 25(2) states that the Commission must not make a decision varying the determination in a way that varies, or has the effect of varying an allocation of capacity if the Commission is satisfied that the allocation, as so varied, would not be of benefit to the public.

3.3 Under section 26 of the Act, in assessing the benefit to the public of a variation of an allocation of capacity, the Commission is required to apply the criteria set out in any policy statement issued by the Minister under section 11.

3.4 On 20 March 2018, the Hon. Michael McCormack MP, Deputy Prime Minister and Minister for Infrastructure and Transport, issued, in accordance with section 11 of the Act, the *International Air Services Commission Policy Statement 2018* (the Policy Statement), which came into effect on 28 March 2018. The Policy Statement sets out the range of criteria which the Commission is required to apply in assessing the benefit to the public of allocations of capacity.

3.5 Section 7 of the Policy Statement explains that in deciding whether to vary a determination, the Commission is to have regard to the 'reasonable capability criterion' set out in section 8 of the Policy Statement and any of the additional criteria set out in section 9

---

<sup>1</sup> Subsection 4(1) defines 'transfer application' to mean 'an application, by an Australian carrier to whom a determination allocates capacity, for one or both of the following:

- (a) a variation of the determination in a way that allocates, or has the effect of allocating, that capacity to another Australian carrier;
- (b) a variation of the determination that varies, or has the effect of varying, one or more conditions of a kind referred to in paragraph 15(2)(d), (e) or (f).

that the Commission thinks to be relevant.

3.6 Section 18 of the Policy Statement which specifically deals with ‘transfer applications’, such as this one, provides that in assessing whether the variation requested would not be of benefit to the public for purposes of subsection 25(2) of the Act, the Commission is:

- (a) to have regard to the reasonable capability criterion in section 8 of the Policy Statement;
- (b) to have regard to the following matters: (i) the undesirability of approving a transfer where doing so will, or is reasonably likely to, permit or encourage any form of speculative activity, including trading in capacity allocations for commercial benefit; (ii) the undesirability, other than in exceptional cases, of approving a transfer application made by a carrier that has never exercised an allocation, or has only exercised an allocation for a period of less than six months; and
- (c) may have regard to any of the additional criteria set out in section 9 of the Policy Statement that it considers to be relevant.

3.7 Under the ‘reasonable capability criterion’ in section 8 of the Policy Statement, the Commission is to assess the extent to which an Australian carrier is reasonably capable of obtaining any licences, permits or other approvals required to operate on and service the route and of using the capacity allocated under the determination.

3.8 The Commission notes that VAIA is an established international carrier and finds that it is reasonably capable of obtaining the necessary regulatory approvals and of using the capacity allocated on the route.

3.9 It was further requested that VAIA’s wholly-owned subsidiary, Tiger International, be permitted to utilise the capacity. The Commission sought advice from the Department of Infrastructure, Regional Development and Cities (the Department) to assess whether Tiger International is reasonably capable of: (a) obtaining any licenses, permits or other approvals required to operate on and service the route; and (b) using the capacity allocated under the determination. On 29 August 2018, the Department advised the Commission that it considers Tiger International as reasonably capable of obtaining the designation, licensing and other operational approvals to operate scheduled services on the Solomon Islands route.

3.10 The Commission does not have information to suggest that VAIA or Tiger International would engage in speculative activity including trading in capacity allocations for commercial benefit. VAIA is an established international carrier which currently holds multiple determinations and other regulatory approvals enabling the carrier to operate scheduled international air services to various routes. Subparagraph 18(2)(b)(ii) of the Policy Statement does not apply in this case.

3.11 The Commission has come to the view that Tiger International is reasonably capable of obtaining any licenses, permits or other approvals required to operate on and service the route; and of using the capacity allocated under the determination. There is public benefit arising from the proposed use of the capacity by Tiger International on the Solomon Islands route. The Commission did not find it necessary to apply any of the additional criteria in section 9 of the Policy Statement.

3.12 In light of the above, the Commission has decided to vary the determination, as

requested by VAASEA, to transfer the capacity allocation to VAIA and to authorise the use of the capacity by Tiger International. In accordance with section 15 of the Act, the Commission may include such terms and conditions it thinks fit.

#### **4 Decision varying determinations [2016] IASC 114 and [2013] IASC 133 on the Solomon Islands route ([2018] IASC 225 and [2018] IASC 231)**

4.1 In accordance with section 25 of the Act, the Commission varies determinations [2016] IASC 114 and [2013] IASC 133 by transferring the capacity entitlements allocated in these determinations to Virgin Australia International Airlines Pty Ltd (VAIA) in accordance with the Australia-Solomon Islands air services arrangements. All references to VAASEA in the determinations are changed to VAIA.

4.2 Furthermore, the Commission varies determinations [2016] IASC 114 and [2013] IASC 133 by *deleting* the conditions in these determinations, except the conditions added by Decision [2016] IASC 204<sup>2</sup>, and replacing the deleted conditions with the following:

- VAIA is required to fully utilise the capacity from 30 December 2018 or such other date approved by the Commission;
- the capacity may be utilised by:
  - VAIA; or
  - Tiger International Number1 Pty Ltd, as long as it remains a wholly-owned subsidiary of VAIA; or
  - such other wholly-owned subsidiary of VAIA that the Commission approves in writing, as long as it remains a wholly-owned subsidiary of VAIA;
- VAIA is not permitted to utilise the capacity to provide code share or joint services with another carrier or any other person unless approved by the Commission;
- changes in relation to the ownership and control of the airlines authorised to utilise the capacity are permitted except to the extent that any change:
  - results in the designation of the airline(s) as an Australian carrier under the Australia-Solomon Islands air services arrangements being withdrawn; or
  - has the effect that another Australian carrier, or a person (or group of persons) having substantial ownership or effective control of another Australian carrier, would take substantial ownership of the airline(s) or be in a position to exercise effective control of the airline(s), without the prior consent of the Commission.

---

<sup>2</sup> Decision [2016] IASC 204 varied [2013] IASC 133 to authorise the use of 180 seats of capacity on the Solomon Islands route for the provision of code share services with Singapore Airlines.

4.3 The decisions come into effect from 1 December 2018 and are valid for the duration of the determinations.

Dated: 21 September 2018
